

DISTRIBUTION OF SPECIALTY MEDICAL ALLOYS

Stainless is a leading manufacturers' agent/stockist/distributor of high performance and value added specialty steels & alloys for microtechnologies, aerospace and especially medical.

The company offers from stock well known and approved sources of metals used in the manufacturing of permanent medical implants and corresponding instruments, for the orthopaedics, reconstruction, trauma, spinal.

Stainless has been a long time exclusive partner of Aubert & Duval, in specialty innovative stainless steels and cobalt base alloys, using and mastering state-of-the-art re-melting technologies with outstanding process control. The same applies with its sister company, UKAD, integrated from mining and sponge, as the 2nd world largest producer, to processing
