

## COMMITTEE F04.13 ON CERAMIC MATERIALS

### MATERIALS

Designation	Description
F1088-04a(2010)	Standard Specification for Beta-Tricalcium Phosphate for Surgical Implantation
F1185-03(2009)	Standard Specification for Composition of Hydroxylapatite for Surgical Implants
F1538-03(2009)	Standard Specification for Glass and Glass Ceramic Biomaterials for Implantation
F1581-08e1	Standard Specification for Composition of Anorganic Bone for Surgical Implants
F1609-08	Standard Specification for Calcium Phosphate Coatings for Implantable Materials
F2224-09	Standard Specification for High Purity Calcium Sulfate Hemihydrate or Dihydrate for Surgical Implants
F2393-12	Standard Specification for High-Purity Dense Magnesia Partially Stabilized Zirconia (Mg-PSZ) for Surgical Implant Applications
F603-12	Standard Specification for High-Purity Dense Aluminum Oxide for Medical Application
<b>WK21829</b>	<b>New Guide for Calcium-Based Bone Void Fillers</b>

## TESTING METHODS

Designation	Description
F1926/F1926M-10	Standard Test Method for Evaluation of the Environmental Stability of Calcium Phosphate Granules, Fabricated Forms, and Coatings
F2024-10	Standard Practice for X-ray Diffraction Determination of Phase Content of Plasma-Sprayed Hydroxyapatite Coatings
<b>WK28902</b>	<b>New Practice for Crystalline Phase Quantification of calcium phosphates, calcium sulphates, and calcium carbonates by X-ray Diffraction</b>
<b>WK28905</b>	<b>New Test Method for Evaluation of the Solubility of Calcium Phosphate Granules, Fabricated Forms, and Coatings</b>

## Partner

*ASTM International is an organization of standardization creating standards concerning various areas such as materials, textiles, plastics, environment, services and medical devices.*

*Today, ASTM counts more than 30 000 members in 125 countries contributing to the development of more than 120 000 standards that the catalog ASTM counts.*
